

# Dr Bjoern von Reumont - Data quality in phylogenetics and phylogenomics

	Definitely agree	Mostly agree	Neither agree nor disagree	Mostly disagree	Definitely disagree	Sum
<b>The subject matter was clear and well-explained</b>	47%	40%	7%	7%	0%	100%
<b>The lecturer was accessible and friendly</b>	60%	33%	7%	0%	0%	100%
<b>Sum</b>	-	-	-	-	-	-

\*Sequence of numbers in a cell

Relative frequency row

## Table of contents

Report info .....	1
<b>Question 1:</b> What degree programme are you registered for? .....	2
<b>Question 2:</b> What percentage of lectures and backup classes/tutorials for this module did you attend? .....	3
<b>Question 3:</b> Overall, approximately how many hours per week did you spend on studying this module? .....	4
<b>Question 4:</b> Thinking about this module, please indicate to what extent you agree with the following .....	5
<b>Question 5:</b> Comments on course content and organisation .....	6
<b>Question 6:</b> Thinking about the assessments and feedback for this module .....	7
<b>Question 7:</b> Comments on feedback –if you did not find feedback helpful please state why.....	9
<b>Question 8:</b> Thinking about the teaching contributions of individual lecturers, .....	10
Dr David Redding – Introduction to R/Introduction to Statistics in R .....	10
Dr Robin Freeman - Introduction to Python .....	10
Prof Francois Balloux - Population & Evolutionary Genetics .....	11
Prof Mark Thomas - Population & Evolutionary Genetics.....	11
Dr Matteo Fumagalli - Population & Evolutionary Genetics.....	12
Jackie Mackenzie-Dodds - Molecular Collections Facility and NHM Molecular Labs .....	12
Steve Russell - Molecular Collections Facility and NHM Molecular Labs .....	13
Prof Alfried Vogler - Species concepts, DNA barcoding and DNA taxonomy .....	13
Roberto Portela Miguez - Using museum collections .....	14
David Smith - Using museum collections.....	14
Oliver Crimmen - using museum collections .....	15
Gavin Broad - using museum collections.....	15
Dr Peter Foster – Phylogenetics .....	16
Dr Bjoern von Reumont - Data quality in phylogenetics and phylogenomics.....	16
Prof Elliot Shubert -The art of writing a successful scientific paper .....	17
Dr Ronald Jenner - The predictive power of phylogenies.....	17
Prof Andy Purvis - Modelling biodiversity responses to human impacts.....	18
Dr David Bass - Metagenomics and next generation sequencing .....	18
Dr Mark Wilkinson – Supertrees.....	19
Dr Peter Olson - Evo-devo and comparative genomics.....	19
Dr Monika Bohm - Assessments of extinction risk on the IUCN Red List: from theory to practice .....	20
Prof Rosie Woodroffe - Dynamics and management of infectious disease threats in wildlife .....	20
Dr Trent Garner - Dynamics and management of infectious disease threats in wildlife .....	21
Dr Robin Freeman - Tracking technology: assessing movement and distribution .....	22
Dr Xavier Harrison - Next Generation Sequencing (NGS) Tools for Conservation .....	22
Dr David Redding – Spatial Analysis .....	23
Henry Ferguson-Gow - Comparative Analysis.....	23
<b>Question 9:</b> Please add any comments on your lecturers.....	25
<b>Question 10:</b> Thinking about the teaching methods, please indicate to what extent you agree with the following .....	26
<b>Question 11:</b> Thinking about the course overall, please indicate to what extent.....	28
<b>Question 12:</b> What were the best and worst aspects of the course? .....	29
<b>Question 13:</b> It is always very useful to illustrate the survey findings.....	30
